

Magnetic Lines

- Link images, text or whatever you want with these magnetic lines!
- These lines will follow your linked object wherever you take it!

Tip Link images to their names; predators to their prey.

Ruler

- Use many pre-set rulers or create your own!
- Zoom in to see each marking in detail.
- Add many rulers to one page to compare.
- Rotate ruler to measure any image

Tip Rulers are not "to scale"

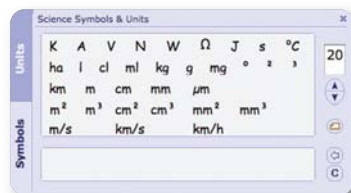

Stop Watch

- Add a stop watch to any page, choose from analog, digital or both!

Tip Use in science experiment relays!

Units and Symbols

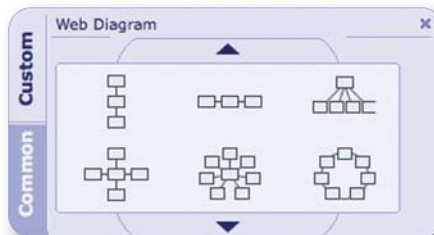

- Create your own cards or just drag and drop.
- These cards include units of measure, symbols and numbers.
- All created by Science teachers for Science teachers.

Tip Can be used in math as well!

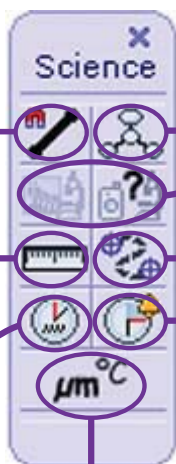

Web Diagrams

- Choose from a list of pre-made web diagrams or create your own
- These diagrams include magnetic lines and are great for use in split screen

Tip Can be used for all subject areas from cycles to organizers!

Easiteach Science Toolbar

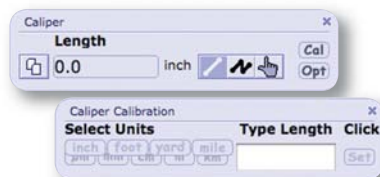

Document Camera Integration

- Seamlessly interact with your document camera right inside RM Easiteach!

Tip Works with laptop webcams!

Caliper

- Accurately measure distance on any map or image!
- Calibrate the Caliper to accurately compare distance, allowing your students to see firsthand how the measurements apply to their world.

Tip How much bigger than a worm is a bear; find the ratio after measuring with the Caliper!

Timer

- Add a timer to any page that includes an alarm for any time you choose.
- Timers display using analog, digital or both.

Tip The default has the sound muted; unmute and turn speakers on.
